Macao SAR Government Administrative Regulation No.15/2014 **Curriculum Framework for Formal Education of Local Education System**"

2014

To establish regional curriculums with high quality and diversity.

To comprehensively enhance the quality of the formal education of Macao.

Basic principle

o promote the holistic development of students

To optimise curriculum structure

To enhance the effectiveness and quality of education

To establish benchmarks for education

Adhering to student-centered education

Direction of reform

**

To scientifically arrange the time of educational activities

To provide a comprehensive, balanced and diverse curriculum

To give schools enough flexibility

180 days 195 school days

Appropriate reduction of weekly lesson hours

Arrangement of appropriate break time between lessons

Setting up of learning areas Compulsory and elective courses Integrated subjects and individual subjects Academic subjects and activities

Adjustment of subjects and lesson hours Other subjects and elective subjects Integrated subjects/ individual subjects Other educational activities Number of school days per week

Application scope of the Formal Education Curriculum Framework

- Infant education, primary education, junior secondary education and senior secondary education of formal education;
- Vocational-technical education and special education are not included;
- Applicable to public schools and private schools of local school

system.

Definition

Curriculum framework for formal education

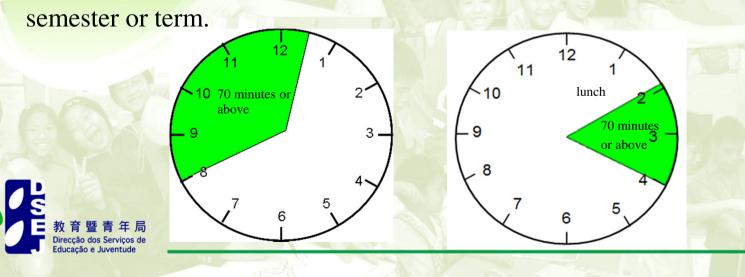

The basic structure of curriculums for infant education, primary education, junior secondary education and senior secondary education of formal education as formulated by the government. The contents mainly include curriculum development criteria, division of learning areas, arrangement for the time of educational activities, and the main subjects of primary education, junior secondary and senior secondary education.

Definition

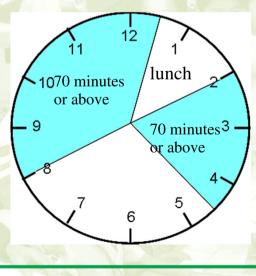

School day

- A half school day: the time during which educational activities of no less than 70 minutes are provided by the school either before or after lunch hours.
 - Except for the examination or assessment days at the end of each

A full school day: the time during which educational activities of no less than
70 minutes are provided by the school both before and after lunch hours.

Except for the examination or assessment days at the end of each semester or term and other educational activities. Each examination or assessment day is considered a full school day regardless of its length of time. If other educational activities of 70 minutes or above are provided in a day, that day is considered a full school day.

Educational activity

**

"Educational activity" refers to any activity organised by the school in accordance with the plan made previously and jointly participated by educators and students for the purpose of promoting the physical and mental development of students. Educational activities include teaching activities, leisure activities and other educational activities.

 Teaching activities

 Educational activities

 Other educational activities

 Deceder ades Serviçes des Educations des

Teaching activity

"Teaching activity" refers to any educational activity carried out by educators in accordance with certain teaching objectives and plans and carried out through related teaching contents and methods for the purpose of guiding students to acquire knowledge, developing their abilities and helping them foster good attitudes and values. Teaching activities mainly include classroom teaching and examinations or assessments.

10

Leisure activity

"Leisure activity" refers to the type of educational activity other than teaching activities. Its objective is to fully develop students' potentials, personality and diverse interests, as well as to promote their holistic development and self-realisation in accordance with the needs of students at different levels.

11

L

Other educational activity

"Other education activity" refers to any educational activity other than teaching

activities and leisure activities.

Other educational activities

Specialised art-education activities (e.g. arts education programme)

Specialised cultural-education activities (e.g. Culture Week)

Social practice activities

Camping activities (e.g. National defense education camp)

Sports games

School anniversary activities

School opening ceremonies, school closing ceremonies, graduation ceremonies Gathering activities (e.g. Christmas party)

Learning support measures

The series of activities that schools carry out within educational activity time in order to help students overcome their learning difficulties and achieve full development.

Having learning difficulties

Expansion of functions

U

Criteria for curriculum development

Infant education curriculum

- To help children achieve the objectives stated in Clause 1 of Article 7 of Law No.9/2006 "The Fundamental Law of Non-tertiary Education"
- **To cultivate students' basic ethical concept and moral behaviour;**
- To help students develop a sociable character;
- To help students develop hygienic habits and promote their physical and mental health;
- To develop students' learning interest and creativity, and develop their various potentials;
- To enrich students' daily life experience;
- To improve students' language abilities and other communication abilities;
- To foster students' interest in arts;
- To help students develop a basic concept of environmental protection.

Infant education curriculum

- The government, schools and teachers must pay attention to the following points (principles):
- To provide infants with an initial and comprehensive education;
 - The curriculum must cater for the learning characteristics of infants, and meet the law of their physical and mental development;
 - To take into consideration the differences between infants in terms of their physical and cognitive development, social and cultural background, as well as their educational needs;
 - To attach importance to the integration of curriculum contents;
 - To take advantage of infants' curiosity and life experience to enhance their learning initiative;
 - To take games as the basic form of learning activities;
 - To adhere to integrating child care and education.

Primary education curriculum

- To help students achieve the objectives stated in Clause 1 of Article 8 of Law No. 9/2006 "The Fundamental Law of Non-tertiary Education"
- To develop students' basic civic consciousness, and foster their self-esteem and their love for others, Macao, the nation and the nature;
- To cultivate students' moral character, and help them develop the attitude of harmoniously getting along with others and the environment, as well as the spirit of serving the society;
- To foster students' interest and habit of enquiry and thinking, so as to promote their creativity;
- To help students acquire the basic knowledge of Natural Sciences, Humanities and Social Sciences, as well as diverse learning skills;
- To provide students with diverse learning opportunities, so as to promote the development of their character and potential;
- To promote students' healthy physical and mental development;
- To cultivate students' ability of adapting to different environments;
- To teach students to make good use of time, and help them foster good living habits and learning habits;
- To enrich students' aesthetic experience and cultivate their interest in arts.

Primary education curriculum

- The government, schools and teachers must pay attention to the following points (principles):
- To help students acquire comprehensive, balanced and diverse learning experience, to promote their holistic development and foster their ability for lifelong learning;
 - The curriculum must cater for primary students' age characteristics, and meet the law of their physical and mental development;
- To take into consideration students' individual differences and their educational needs, so as to fully develop their potential and character;
- To attach importance to the integration of curriculum contents and disciplinary interaction;
- To take advantage of students' life experience to enhance their learning initiative;
- To attach importance to the connectivity between primary education curriculum and infant education curriculum, as well as the connectivity between primary education curriculum and junior secondary education curriculum.

Junior secondary education curriculum

- To help students achieve the objectives stated in Clause 1 of Article 9 of Law No. 9/2006 "The Fundamental Law of Non-tertiary Education"
 - To help students foster good characters and self-esteem, so that they can be optimistic and ambitious, care for others and the development of Macao and the nation, be enthusiastic about social participation and concerned about the ecological environment;
 - To develop students' spirit of thinking, learning proactively and daring to innovate, as well as the attitude and ability of life-long learning;
 - To help students acquire the knowledge related to various aspects of life, enhance their capability of applying their knowledge of language, information technology and other areas to daily life;
 - To assist students to adapt to their physical and mental development, enhance their physical and mental qualities, as well as their problem solving skills;
 - To provide students with diverse modes of education, so as to promote the development of their character and their ability of making their own decision;
 - To promote students' understanding of multiculturalism, and enhance their
 - Shumanistic and artistic literacy.

Junior secondary education curriculum

- The government, schools and teachers must pay attention to the following points (principles):
- To take advantage of various learning environments to organise diverse activities, so as to help students acquire comprehensive, balanced and diverse learning experience, as well as to promote their holistic development and nurture their ability for lifelong learning;
- The curriculum must cater for junior secondary students' age characteristics and meet the law of their physical and mental development;
- To take into consideration students' individual differences and their educational needs;
- To enhance students' physical and mental qualities, especially their psychological quality, so as to strengthen their ability to withstand negative impacts and setbacks, as well as to promote their healthy development;
- To improve students' communication and collaboration skills, as well as their independent learning ability;
- To provide students with opportunities to participate in social practice, so as to cultivate their ability and interest in social practice and develop their career planning ability;
 - To attach importance to the connectivity between junior secondary education curriculum and primary education curriculum, as well as the connectivity between junior secondary education curriculum and senior secondary education curriculum.

**

Senior secondary education curriculum

- To help students achieve the objectives stated in Clause 1 of Article 10 of Law No. 9/2006 "The Fundamental Law of Non-tertiary Education"
- To enhance students' national consciousness, global vision and awareness of environmental protection, and strengthen their understanding of and the sense of belonging to Macao, so as to help them become responsible citizens;

To enhance students' moral accomplishment, so as to help them establish the concept of career development;

- To promote the sustained development of students' mental health and character, so as to help them develop the traits of being brave, determined, passionate for life and creative;
- To promote students' understanding of Mathematics, Natural Sciences, Social Sciences, Technology and Humanities, etc., so as to cultivate their capability for further study or employment;
- To nurture students' capability of collecting, sorting and analysing information, further enhance their capability of making use of information technology, and develop their habits of selflearning and cooperative learning, so as to promote their lifelong development;
- To help students develop healthy living habits and maintain a strong physique;
- To enhance students' humanistic literacy, especially their arts literacy, and strengthen their
 - s understanding of multiculturalism and encourage them to pursue cultural innovation.

Senior secondary education curriculum

- The government, schools and teachers must pay attention to the following points (principles):
- To broaden students' knowledge base and provide them with diverse learning programmes, so as to offer them more choices and thereby help them fulfil their own ambition and develop their interests;
 - To promote the holistic development of students and nurture their lifelong learning ability;
 - The curriculum must cater for senior secondary students' age characteristics and meet the law of their physical and mental development;
- To take into consideration students' individual differences and their educational needs;
- To foster students' positive values and attitudes, as well as enhance their career planning ability, so as to lay a foundation for their access to tertiary education, employment and future development;
 - To encourage students to participate in social practice actively and enhance their civic awareness and capability;
- To attach importance to the connectivity between senior secondary education
 - curriculum and junior secondary education curriculum.

School year and time of educational and teaching activities

- School year: The period between 1st September of each year and 31st
 August of the following year.
 - Number of school days: The total time of educational activities that a school carries out in each school year should be no less than 195 school days. However, Primary 6 of primary education, Junior secondary 3 (Form 3) of junior secondary education and Senior secondary 3 (Form 6) of senior secondary education are not subject to this regulation.
- Break between lessons: Students must be given appropriate break
 - time between 2 consecutive lessons.

**

• Time of sports activities:

Students of primary, junior and senior secondary education must have sports activities for no less than 150 minutes per week, except for the examination/assessment week at the end of each semester or term.

Sports activities include:

- Physical education lessons (at least 70 minutes per week)
- Morning exercises and exercises between lessons
- Various sports games
- Eye exercises
- Sporting leisure activities

Leisure activities

**

- **Target:** Students of primary, junior and senior secondary education they must participate in leisure activities and meet the corresponding requirements of leisure activity time.
 - Students of infant education –voluntary participation.
- **Organiser:** Organised by the school.
 - School collaborates with external institutions to organise leisure activities

Requirements: • The leisure activities should be as diverse as possible.

- Students can choose what type of leisure activities to participate in.
- Schools must include the leisure activities in the annual plan of educational activities, and set the

objectives of and make a plan for the leisure activities. Schools must also establish assessment criteria for the leisure activities, and assess and record students' participation in the leisure activities.

• Assessment results should not be used as a basis for deciding the promotion or retention of a student.

School curriculum development

- Prerequisite: The "Curriculum Framework" and "The Requirements of Basic
 Academic Attainments" must be complied with.
- Requirements: The development of school curriculum should reflect the education philosophy and educational characteristics of the school, as well as respond to the

development needs of students and the society.

School curriculum development

• **Contents:**

- Objectives of the school curriculum
- Curriculum structure of every grade:
 - Regulation of the time of educational activities;
- Establishment of teaching themes and modules for the infant education level and the related schedule;

- Setting up of subjects and leisure activities for primary, junior and senior secondary education and the establishment of the related schedules;

- Organisation of other educational activities and the related schedules.
- **Requirements of academic attainments**
- Specific teaching contents, form of teaching activities and leisure activities, teaching progress
- Arrangement of child-care measures at the infant education level
- Selection, adaptation or development of teaching materials
- Assessment methods and criteria for curriculum
- School calendar

Learning assistance measures

- Students with learning difficulties or inadequacy
 - Students with spare capacity or specialties

Principle

Target

**

- Following students' learning pace
- The measures should be carried out within the school year

Learning assistance measures

Contents

- To organise group or individual tutoring activities to solve students' problems in learning and assist them to complete their assignments
- To provide students with guidance and learning plan
- To make good use of after-school hours
- Optional courses (curriculum contents, lesson hours, teaching spaces, strategies)
- Targeted curriculum resources

Learning assistance measures

Provider of the measures

- Schools
- Schools may request to cooperate with public entities to provide the measures

Assessment

- Who to conduct the assessment: leading body of teaching affairs of the school
- Contents: To assess the effectiveness of the provided learning
 - assistance measures
- Method: Summative assessment

Placement and organisation of teachers during the implementation of curriculum

Principle: Taking into account the curriculum planning and students' needs Ensuring and promoting students' learning and educational success

learning area/ subject

curriculum progress

Requirements: Infant and primary education – To ensure the comprehensiveness of teaching activities

Junior and senior secondary education – To ensure one teacher teaching one subject or one learning area

•••

School curriculum evaluation

Objectives:

- To review the rationality of curriculum design and the effectiveness of curriculum management, so as to enhance teachers' curriculum literacy;
- To review the effectiveness of curriculum implementation and students' learning in order to enhance the quality of education.
- **Basis:** Curriculum Framework, Requirements of Basic Academic Attainments

***** Forms and methods

- School's internal evaluation
- External evaluation conducted by external entities

Implementation schedule
